

Bits & Pieces

July 09

The heat is on and Summer is here. Temperatures are around 100 degrees with the heat index at 107. With the heat precautions must be taken by us. You must drink plenty of water and stay hydrated and try and stay out of the heat. We on the maint. Crew must also try and stay cool. During aerification the day was very hot but we managed to finish all the greens in one day. We are also watering a lot during the day, fairways , tees and greens are the most important. While watering we are also trying to spray herbicides so we must try to spray where we will not water for the day. A lot of timing comes into play. The driving range is almost ready for play and soon will be open, with the mats being installed at a later day. We will be doing some landscaping around the entrance to the club . Bedding and shrubs will be installed. The greens committee is working hard to set up a short term goals and long range goals list. On the top of the list is to check the sprinklers on all the course. We will be checking heads throughout the day and making a list of what works and what does not so we can fix or replace them. Your patience while this is ongoing is appreciated.

The 19th hole - Daily specials being offered. Come By and bring the kids. Corn Dogs and hot dogs for everyone.

Please Do not use any profanity in the bar area. Speak kindly we have kids around.....
